

Mercury Marine (a division of Brunswick Corporation, NYSE:BC) is the world leader in the manufacture of recreational marine propulsion engines. Employing Lean Six Sigma methodology, we have made lasting improvements in our products, processes, and service that have earned us J.D. Power Awards for Customer Satisfaction on both the Optimax 2-stroke and MerCruiser sterndrive power. Being the world leader doesn't happen by chance. It takes investment in leading edge technologies and top rated talent to create and maintain innovative product offerings that shape the future of marine propulsion. We are ready to make that investment in you!

GENERAL RESPONSIBILITIES:

Serve as a dynamic change agent and aggressively lead business improvement projects using lean and six sigma tools. Provide sustained improvement to critical manufacturing and transactional processes to help management achieve strategic goals and impact financial results. Challenge conventional thinking, mentor Lean or Six Sigma employees, and assemble multiple teams as needed to support tactical efforts, serving as both a team leader and coach.

Primary Duties and Responsibilities:

- Attain results in ambiguous and changing situations
- Assist leaders and managers with project prioritization and initiation
- Mentor and lead diverse teams to attain project results while developing people
- Build rapport and influence others in a positive manner
- Solve problems using facts while managing change and project risk

Job Requirements : Basic Qualifications:

- Documented project experience
- Communicate effectively with all levels of the organization and with customer
- Ability to:
 - Perform in a tactful, professional and flexible manner with diverse personalities
 - Drive results through influence
 - Build relationships, develop people, and create high-performing teams
 - Lead teams to decisions in sensitive, complex, or ambiguous situations
 - Work with large volumes of process data using statistical methods
- Excellent organization and follow-up skills
- Able to work under extreme confidentiality
- Bachelors Degree or equivalent experience
- 1-5 years Lean or Six Sigma experience (black belt or equivalent)

Preferred Qualifications:

- Black Belt, Lean Sensei, or TOC Jonah certification
- Masters Degree
