

Plexus – Quality Engineer

Plexus has an exciting opportunity for a talented Quality Engineer Sr. to join our Neenah Operations team! At Plexus Corp., we manufacture products that defend our nation, maintain national security and improve the human way of life. Our customer's products require the utmost reliability and focus on quality. Our quality teams are responsible for interfacing directly with prestigious Fortune 500 companies to drive our manufacturing to world class quality levels. As the voice of the customer you will leverage your engineering knowledge to develop solutions that will change the landscape of how integrated electronic assembly is completed.

As a quality engineer you will learn to apply engineering design concepts, adapt your problem solving skills to work in real time with production issues, create world class manufacturing processes and know that you have a direct impact on the way of life for the world.

Key Job Accountabilities:

- Understanding of and primary customer interface for all customer quality specifications and requirements
- Experience with digital electronics testing and troubleshooting
- Use of statistical analysis tools and methods for problem solving
- Facilitate and participate in quality metrics reporting and communication
- Coach and mentor individuals and cross-functional teams in quality systems, tools, and philosophies
- Define and manage all customer quality plans
- Facilitate all quality-related activities associated with customer product introductions within APQP, etc
- Approval of all product changes (ECOs, deviations, validations, etc.) to ensure customer requirements and expectations are met, and verification that changes are correctly implemented
- Support external audit activities relative to product requirements
- Support product and process changes and evolution, ensuring product quality integrity is maintained
- Support quote and contract review process, ensuring customer quality requirements are met

Education & Experience:

- A minimum of a Bachelor's degree in engineering or related field or equivalent experience is required. Experience of 5 years as an engineer is preferred for this position assuming education requirements are met.
- Equivalent EMS industry experience of 1 or more years is highly desirable
- Proficient working knowledge of quality systems and tools for applicable industry requirements (i.e. AS, Medical, etc.)
- Proficient working knowledge of manufacturing process standards (IPC, etc.)
- Basic Lean and Six Sigma skills – Green Belt Preferred
- Proficient presentation skills
- Proficient data analysis skills
- Self-management capabilities
- Ability to lead and multi-task in a dynamic environment

Qualifications:

All offers of employment are contingent upon successfully passing a drug screen and upon completion of a confidentiality agreement. Our Values and How We Lead behaviors guide our processes. Plexus does not make employment decisions based on race, color, religion, national origin, sexual orientation, gender identity, disability, or veteran status. We are proud to be an Equal Opportunity Employer (EOE) and encourage all to apply today! Globally, our policy is to recruit people from wide and diverse backgrounds. Some of our customers contracts are governed by the International Traffic in Arms Regulations (ITAR), which require us to consider only applicants who are US citizens, permanent residents (green card holders), or who have been granted political asylum. Consequently, some of our positions are subject to this ITAR requirement. Thank you for your understanding.

Please go to plexus.com and apply today! For additional information, please reach out to Blair Plamann, Human Resources, at blair.plamann@plexus.com

Best Regards,
